

Articulated telescope offers a variety of possibilities

LEO 16 GT[®]

LEO 16 GT[®]

"the most versatile ever"!

The advantages

- Rubber crawlers
- Can swivel on own axis using crawlers
- Genuine one-man operation
- All functions operable from basket
- Only 94 cm wide and 1.98 m high
- Supported width under 2.80 m
- Smooth boom profile – no parts can get tangled up
- Minimal ground pressure, thereby usable "everywhere"
- Power via Diesel engine and 230 V mains (inside)
- Special design allows boom to lower under its own weight
- Greater stability due to double "under-arm"
- Sensitive proportional steering
- High travelling stability due to the crawlers
- Self-propelled via hydrostatic crawler system up to 30%

Compact – efficient operation

Facility Management

Tree cutting

Industrial use

Maintenance & service

Easy to transport

Electronic remote-control

TEUPEN[®]
